Basic Data				Technical Ratings			
52-week High	1,826.90		(in Million)	Resistance 2	1,730	MACD	Bullish
52-week Low	1,572.03	KLCI Vol	91.63	Resistance 1	1,700	RSI (14)	Neutral
Current Level	1,682.87	Bursa Vol	2410.08	Current Level	1,682.87	Stochastic	Neutral
Intraday High	1,682.87	Bursa Val	1723.73	Support 1	1,650		
Intraday Low	1,677.98			Support 2	1,600	Outlook	Bullish

Asian markets mixed ahead of Fed chair’s testimony

- Majority of the Asian shares continued to end lower as market participants continue to be cautious while waiting for Federal Reserve chairman’s testimony this week.
- Back home, the FBMKLCI gain 5.23 points (+0.31%) to end at 1,682.87 after BNM announced to maintain overnight policy rate (OPR) at 3%.
- Chart-wise, the index consolidating in between 1,650 and 1,700 due to lack of fresh catalyst in the market while key indicator ranging in the neutral zone.
- From here, resistances can be found at 1,700 (R1). A break above should see the index trend higher towards 1,730 (R2).
- Conversely, downside supports can be identified at 1,650 (S1) and 1,600 (S2).

Dow ended lower as investors remain cautious ahead of Powell report

- Yesterday, U.S. stock markets ended mixed as the focus remains on chances for interest-rate cuts when policy makers meet at the end of the month.
- The Dow lost 22.65 points (-0.08%) to end at 26,783.49.
- Chart-wise, the index is in the midst of testing the 27,000-level. The underlying trend of the index remains bullish with the index trading above all key SMAs, while its 20- and 50-day SMAs have shown “Golden-Cross” formation, which leads us to believe that there could be more room for upside.
- Look out for a break above 27,000 (R1), which would then spur the index higher towards 27,800 (R2), while downside supports can be found at 25,500 (S1) and 24,800 (S2).

Daily technical highlights – (HOMERIZ, DUFU)

HOMERIZ (Not Rated)

- HOMERIZ gained 4.5 sen (+7.20%) to close at RM0.670.
- The share has been going through a consolidation since early-May.
- Yesterday candlestick closed above all key-SMAs backed by above-average trading volume and strong buying interest.
- Given its RSI that is still trending within its neutral zone, we believe there could be room for the share to rally and test overhead resistances at RM0.700 (R1) and RM0.720 (R2).
- Conversely, downside support can be seen at RM0.630 (S1) and RM0.615 (S2).

DUFU (Not Rated)

- DUFU increased by 11.0 sen (+6.75%) to end at RM1.74 yesterday.
- Chart-wise the share has been gradually trending above all key-SMAs since with the formation of a saucer pattern.
- Yesterday, candlestick saw the formation of a “Marubozu” pattern, which indicates strong buying interest. Coupled with a Bullish MACD-Crossover, we believe the share could trend higher.
- Should buying momentum persist, key resistances can be seen at RM1.90 (R1) and RM2.10 (R2).
- Conversely, key support level is seen at RM1.50 (S1) and RM1.40 (S2).

Basic Technical Terms:

Reversal Candlesticks	Patterns	Description
Doji Dragonfly Doji (Bullish) Gravestone Doji (Bearish)		Dojis form when a security's open and close are virtually equal. The length of the upper and lower shadows can vary, and the resulting candlestick looks like, either, a cross, inverted cross, or plus sign. Doji convey a sense of indecision or tug-of-war between buyers and sellers.
Engulfing Pattern		A reversal pattern that can be bearish or bullish, depending upon whether it appears at the end of an uptrend (bearish engulfing pattern) or a downtrend (bullish engulfing pattern). The first day is characterized by a small body, followed by a day whose body completely engulfs the previous day's price action.
Hammer (Bullish) Shooting Star (Bearish)		Hammer candlesticks form when a security moves significantly lower after the open, but rallies to close well above the intraday low. This appears in a downtrend. In contrast, the Shooting Star pattern appears in an uptrend. It opens higher, trades much higher, then closes near its open. It looks just like the Inverted Hammer except that it is bearish.
Inverted Hammer (Bullish) Hanging Man (Bearish)		The Inverted Hammer is a single-day bullish reversal pattern. In a downtrend, the open is lower, then it trades higher, but closes near its open price, therefore looking like an inverted lollipop. Hanging Man candlesticks form when a security moves significantly lower after the open, but rallies to close well above the intraday low.
Harami Harami Cross		The Harami is a two-day pattern that can be bullish or bearish. It has a small body day completely contained within the range of the previous body, and is the opposite colour. The Harami Cross is similar to the Harami. The difference is that the last day is a Doji.
Marubozu		A Marubozu candlestick has no shadow extending from the body at either the open, the close or at both.
Morning Doji Star (Bullish) Evening Doji Star (Bearish)		A Morning Doji Star (Evening Doji Star) is a three-day candlestick bullish (bearish) reversal pattern - a long-bodied black (white) candle extending the current downtrend, a short middle candle that gapped down (up) on the open, and a long-bodied white candle that gapped up (down) on the open and closed above (below) the midpoint of the body of the first day.
Spinning Top		Spinning Tops are candlestick lines that have small bodies with upper and lower shadows that exceed the length of the body. They are similar to the Doji candlesticks, and signal indecision.
