Daily Charting – FBMKLCI index

Source: Kenanga Research

Asian markets rose ahead of Powell's speech

- Asian stock markets ended the week higher, as investors looked ahead to the Fed's Chairman Jerome Powell's speech.
- Back home, the FBMKLCI gained 6.86 points (+0.43%) to close at 1,609.33, registering WoW gain of +0.63%.
- Chart-wise, the underlying trend of the index remains bearish as the index remains below all its key-SMAs. However, we do not discount the possibility of a technical-rebound given that stochastic has been in oversold territory for a long period (around 1 month).
- Look out for overhead resistance levels at 1,630 (R1) and 1,650 (R2).
- Should selling pressure continue, key support levels to keep an eye on are 1,570 (S1) and 1,550 (S2).

Technical Ratings			
Resistance 2	1,650	MACD	Bearish
Resistance 1	1,630	RSI	Neutral
Current Level	1609.33	Stochastic	Neutral
Support 1	1,570		
Support 2	1,550	Outlook	Bearish

Daily Charting – Dow Jones Industrial Average

Wall Street plunged as trade war escalates

- Last Friday, U.S. stock markets plunged after China announced retaliatory tariffs on USD75b worth of U.S. goods. In return, Trump ordered U.S. manufacturers to find alternatives to their operations in China.
- The Dow plummeted 623.34 points (-2.37%) to end at 25,628.90, registering WoW loss of -0.99%.
- Given that the index remains below its key SMAs, the underlying trend of the index continues to remain bearish.
- The index has also failed to overcome its 100-day SMA earlier, unlike in Nov 2018. As such we believe the index could be poised to head lower.
- From here on, support levels can be identified at 24,800 (S1) and 24,200 (S2), while resistance levels can be found at 26,700 (R1) and 27,800 (R2).

Technical Ratings			
Resistance 2	27,800	MACD	Bearish
Resistance 1	26,700	RSI	Neutral
Current Level	27,192.45	Stochastic	Neutral
Support 1	24,800		
Support 2	24,200	Outlook	Bearish

Foreign investors remained as NET SELLERS with a total cumulative net outflow of RM372.8m compared to a cumulative net outflow of RM598.1m in the prior week.

Basic Technical Terms:

Reversal Candlesticks	Patterns	Description
Doji Dragonfly Doji (Bullish) Gravestone Doji (Bearish)		Dojis form when a security's open and close are virtually equal. The length of the upper and lower shadows can vary, and the resulting candlestick looks like, either, a cross, inverted cross, or plus sign. Doji convey a sense of indecision or tug-of-war between buyers and sellers.
Engulfing Pattern		A reversal pattern that can be bearish or bullish, depending upon whether it appears at the end of an uptrend (bearish engulfing pattern) or a downtrend (bullish engulfing pattern). The first day is characterized by a small body, followed by a day whose body completely engulfs the previous day's price action.
Hammer (Bullish) Shooting Star (Bearish)		Hammer candlesticks form when a security moves significantly lower after the open, but rallies to close well above the intraday low. This appears in a downtrend. In contrast, the Shooting Star pattern appears in an uptrend. It opens higher, trades much higher, then closes near its open. It looks just like the Inverted Hammer except that it is bearish.
Inverted Hammer (Bullish) Hanging Man (Bearish)		The Inverted Hammer is a single-day bullish reversal pattern. In a downtrend, the open is lower, then it trades higher, but closes near its open price, therefore looking like an inverted lollipop. Hanging Man candlesticks form when a security moves significantly lower after the open, but rallies to close well above the intraday low.
Harami Harami Cross		The Harami is a two-day pattern that can be bullish or bearish. It has a small body day completely contained within the range of the previous body, and is the opposite colour. The Harami Cross is similar to the Harami. The difference is that the last day is a Doji.
Marubozu		A Marubozu candlestick has no shadow extending from the body at either the open, the close or at both.
Morning Doji Star (Bullish) Evening Doji Star (Bearish)		A Morning Doji Star (Evening Doji Star) is a three-day candlestick bullish (bearish) reversal pattern - a long-bodied black (white) candle extending the current downtrend, a short middle candle that gapped down (up) on the open, and a long-bodied white candle that gapped up (down) on the open and closed above (below) the midpoint of the body of the first day.
Spinning Top		Spinning Tops are candlestick lines that have small bodies with upper and lower shadows that exceed the length of the body. They are similar to the Doji candlesticks, and signal indecision.
